September 2, 2014

Dear Gretchen and Peter,

Janet and I want to thank you and your employees for a job that exceeded our expectations. We chose you because you had the best ideas, which were not only creative, but very practical. Plus you were recommended by a previous satisfied customer.

I happened to see the pictures you posted of the project as it progressed. That in itself shows the insight you two had when it comes to creating a product that the customer will appreciate. What the pictures won't show is the detail that went into this project. Such as the precision in cutting the pavers and the way they were laid. There are a lot of curves on this project and it would have been easy to square everything off to eliminate all of the cutting that had to be done. Your insight on having the curves match the pool gave this project a very soft and elegant look.

We both appreciated the fact that your employees worked tirelessly from the beginning to the end, never missing a day. They were always polite and cleaned-up after each day's work.

The deck area is now the highlight of our beautiful new home. Everyone who visits says they feel as though they are at a resort.

Kindest Regards,

  
Janet and Randy
